

Aziz Emre Ayan

Computer Science Student | AI & Software Development

azizayan52@gmail.com | azizayan.com | linkedin.com/in/aziz-emre-ayan | github.com/azizayan

PROFILE

Computer Science undergraduate at Bilkent University focused on practical AI and software systems, including local-first tools, realtime pipelines, and command-line applications.

EDUCATION

Bilkent University
B.Sc. in Computer Science

Ankara, Turkey
2023 – Present

Stanford University
Code in Place Certificate

Remote
2024

PROJECTS

MeetCinema

Rust, Tauri, whisper.cpp, Nokhwa, CPAL

- Building a local, private desktop application for live captions and meeting notes across video-call platforms
- Captures webcam and microphone input, transcribes speech on-device, and sends captioned video through a virtual camera

Interruptible Realtime Voice Agent

Next.js, FastAPI, Pipecat, Daily, Deepgram, Cartesia

- Built a browser-based voice agent with realtime speech-to-text, LLM responses, text-to-speech, and mid-utterance interruption
- Streams agent state, round-trip latency, and interruption events to a live dashboard over a WebRTC data channel

Paper Review CLI

Python, LLM, Overleaf

- Built an AI-powered academic paper reviewer that converts an Overleaf URL into structured, comment-style manuscript feedback

AgentMesh

Multi-Agent Systems, Local-First

- Developing a local-first coordination fabric for software agents

Cortex

Workspace Agent, MCP

- Developing a context-aware workspace agent built around a daemon and Model Context Protocol integration

EXPERIENCE

Research Fellow

Freya Research Fellows

Remote
September 2026 – Present

- Selected for an independent researcher community focused on understanding and advancing artificial intelligence research

Volunteer Team Member

We Have Amazing Friends

Remote
September 2026 – Present

- Help maintain and improve the mentorship platform connecting students with professionals around the world

Software R&D Intern

SRDC

One-month internship

- Contributed to software research and development projects spanning artificial intelligence, data management, healthcare informatics, and enterprise systems

President

Bilkent AI Society

Ankara, Turkey
2024 – Present

- Lead workshops, conferences, and mentorship initiatives for the university's AI community

TECHNICAL SKILLS

Programming: Python (primary), Rust, TypeScript, Java, C++

AI & Data: scikit-learn, NumPy, pandas, matplotlib, prompt design, tool routing, LLM applications

Frameworks & Tools: FastAPI, Next.js, Tauri, Pipecat, WebRTC, Docker, Git/GitHub, MCP
